**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-21,26,34,40-42,48 and 75-83 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-46 of copending Application No. 10/957,540. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims draw to a process for processing of waste to produce useful materials comprising preparing a slurry and reacting the slurry to produce a reacted feed. The present claimed set does not claim the addition of one or more reagents that suppress hydrolysis of carbohydrates. However, the present claimed set does not include the addition of such reagents.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1764

Claims 1-21,26,34,40-42,48 and 75-83 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-75 of copending Application No. 10/954,691. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims draw to a process for processing of waste to produce useful materials comprising preparing a slurry and reacting the slurry to produce a reacted feed. The present claimed set does not claim the second reaction zone. However, the present claimed set does not include the use of a second reaction zone.

### ***Response to Arguments***

The argument that the provisional double patenting rejection should be withdrawn since the foregoing rule is applicable here as the provisional double patenting rejection is the only rejection remaining is not persuasive. Since the later-filed application has not been examined, it cannot be determined whether or not the later-filed application is rejected on ***other grounds***. Also, since there are three applications containing claims that conflict such that an obvious double patenting (ODP) rejection is made in each application based upon the other two, it is not sufficient to file a terminal disclaimer in only one of the applications addressing the other two applications. Therefore, the double patenting rejection is maintained.

The ODP rejection over claims 1-46 of copending Application No. 10/857,540 has been changed to 10/957,540 due to typos.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
